Chiller Table Extender Instructions

The chiller table extender sits slightly above the bottom of the table (about 1-2 cm) when it is fully installed. Do not try to push the extender to the bottom of the table as some of the acrylic panels may crack.

1. Assemble the first half of the unit by sliding the end panel marked "A" into the two corner brackets also marked "A".
2. Slide the longer side panels marked "B" into the corner brackets where they are also marked "B".
3. Slide the panel marked "Centre" into the two brackets marked as "Centre" and then connect that piece to the panels marked "B". You should have one half of the extender assembled.
4. Repeat the steps to complete the other half of the extender set.
