OTTOMAN INSTRUCTIONS

- Put together a 4'x4' stage panel with 16" legs.
- Put one piece of foam on top of the panel.
- Turn ottoman cover inside out. Lay it on top of foam with corners of cover matched with the corners of the foam.
- With one guy holding one corner, have another guy stretch the opposite corner over the panel. Pull down, but make sure you do not catch the cover on the leg pins. When one side is on, stretch the other side over. The covers are very tight and it might take a couple tries to get it on properly.
