Deluxe Fabric Backdrop Installation

Make sure you assemble the backdrop in the area where it will be used as it is very difficult to move after assembled.

1. Assemble the upright sections of the backdrop by sliding the shorter section of the upright over the lower section and gently pressing down to fit them together. Position them the appropriate distance apart in the desired area.
2. Assemble the fabric support section. This will be either two end sections (with short posts on the ends) to make 13 feet or two end sections with a middle extender piece to make 20 feet. Make sure the fabric is in place before assembly. Slide the fabric onto any one section, making sure the velvet side faces the direction you want the backdrop to go.
3. Slide together all the pieces for the fabric support section.
4. Using three people (one in the middle, two on the ends), pick up the support section. Tilting the upright posts down, lift the support section up and slide the short posts of the support section into the uprights.
5. Tilt the entire backdrop up into place and adjust fabric as needed.
