CAMBRO THERMAL CONTAINERS INSTRUCTIONS

Generally, no preheating is necessary, however, in the case of cold weather or if the container is cold, fill with hot water and let it stand until the interior is warm. Next, empty the water out and fill it with your desired beverage.

Always fill each container as full as possible.

Be sure lid gasket is in place before closing the container.

Always fill and close the container as rapidly as possible.

Open vent cap for two to three minutes for initial steam release.

Before returning the containers, please do the following:

- Empty the container
- Rinse or wash the interior of the container with warm soapy water.
- Allow clean warm water to run through the spigot of the container for at least 30 seconds.

Thank you for your cooperation.
